

Introduction to Computers (IDC101)

Academic Session 2018-19

Lab Session - 08

November 05-09, 2018

1. Write a single program that is prone to all of the following errors: ImportError, ZeroDivisionError, OverflowError, IndexError, IOError, ValueError, TypeError, KeyError. Now fix this program so that none of these errors abort the program.
 2. Fix all the programs that you have written in Lab 01, Lab 02 and Lab 03 so that they do not abort abruptly because of errors.
