- 5) Mahalakshmi Sharma → 
- 6)
- 7)

Date: 30-01-2020

Response to the requests made by HYCLONE LIFE SCIENCES SOLUTIONS INDIA PRIVATE LIMITED  
dated 31.01.2020

The specifications were designed after several rounds of extensive discussions with the potential users at IISER Mohali and all the technical expert committee members by taking all our research requirements into account. Our research performance is critically dependent on each item that has been included in the specifications. The FCS/FCCS module, EMCCD, all the lasers, various modes of illuminations and detections, and cameras outlined in our specifications are absolutely necessary for our research. Therefore, we are unable to amend the specifications.
